

# On Thursday 8th of September the 2011 edition of Offshore Europe, the largest Offshore Oil & Gas exhibition in the continent was called to an end.

Aerospace and Marine Intl. (AMI) would like to thank all its existing and potential clients that participated in our reception and seminar titled "Use, Applications, Reach and Limitations of Marine Weather Forecasting Services". Mr Keith Thomson, AMI UK Operations Manager was greeted by a warm audience. We extend our sincere appreciation as we continue to provide value and expertise to all our long standing and new clients who are important parts in making 2011 a record year for the Aerospace & Marine Offshore Services Division.

AMI's offshore rig, terminal, construction, and lightering Weather Forecast Support Services along with our Tow Optimization Services continue to find new users and the word is spreading fast amongst Offshore Oil & Gas Project Managers, Drill Managers and Captains - "AMI's Forecasted Ocean Currents and Weather Forecast Services are as reliable as the tides".

We thank you all for your loyalty and support. We shall keep on working hard in order to continue exceeding your expectations.
